EVERYTHING LOOKS FINE ... BUT IS IT REALLY?

**A VISUAL INSPECTION IS NOT ENOUGH
AND INFRARED CAMERA TESTING CAN BE
UNRELIABLE UNLESS VERIFIED CORRECTLY!**

OUR SIMPLE 3-POINT SYSTEM

IDENTIFY vulnerable areas prone to moisture intrusion.

EVALUATE if moisture intrusion is having a negative impact on the substrate using precise moisture probe testing equipment.

REPORT all findings in a detailed report by wall section, complete with accurate moisture readings, summary of issues with digital pictures, and recommendations for troubled areas.

*Certified Stucco & EIFS Inspector (Moisture Free Corporation)
